

HOURLY PRECIPITATION DATA CALIFORNIA

DECEMBER 1995

With Annual Supplement

VOLUME 45 NUMBER 12

ISSN 0364-6092

"I certify that this is an official publication of the National Oceanic and Atmospheric Administration (NOAA). It is compiled using information from weather observing sites supervised by NOAA/National Weather Service and received at the National Climatic Data Center (NCDC), Asheville, North Carolina 28801."

REFERENCE NOTES.

Hourly Precipitation Data (HPD) are obtained from recording rain gages. The rain gage may be located at a National Weather Service, Federal Aviation Administration, or cooperative observer station. HPD time resolution is 15 minutes or 1 hour. Published data are displayed at an hourly resolution. Precipitation values in this bulletin are in inches. Times are local standard. Amounts too small to be measured (traces) are not included.

Standard rain gage types:

F Fischer-Porter : reported in inches to tenths
T Tipping bucket : reported in inches to hundredths
U Universal : reported in inches to hundredths
N Not specified

HPD maxima cover 9 time periods from 15 minutes to 24 hours and do not necessarily end on whole hours. Stations that report hourly data only will not have maxima computed for periods less than 1 hour. If any data are missing, no maxima are computed. MAX ACCUM is the largest accumulated precipitation amount from times with unknown data distribution during a month. A maximum value may be exceeded in an accumulation.

Information contained in the station name:

// Rain gage equipped with a wind shield.

\$ Experimental rain gage or unusual measurement procedure which may have some effect on HPD.
Common types are:

\$1 rain gage with a heated orifice
\$2 rain gage with an automatic siphon
\$3 rain gage with a remote orifice and funnel

8 SW or other numbers and letters following the name, indicate the distance in miles, and the direction, from the post office.

Special symbols in the HPD:

- Data missing for part or all of the period.
- * Data distribution unknown. First HPD value that follows is the total accumulated amount.

Only the first and last rows of long groups of missing (-) and accumulated (*) data are shown.
- X Value greater than 9.99 - refer to Hourly Precipitation Section for daily total.
- + Duplicate maxima for same time period; latest is shown.
- E Estimated total.
- # Inactive
